## Professional Summary

I am an experienced Software Engineer with a strong background in backend development across multiple industries, including finance and online marketplaces. Passionate about sustainable software development, open-source contributions, and continuous learning. Experienced in working with numerous programming languages, including Go, Ruby, JavaScript, and C#.

Proficient in building and maintaining microservices, applying SOLID principles, automated testing, and the 12-factor methodology. Experienced in designing efficient ETL data pipelines, managing databases, and designing APIs. Active mentor in the open-source community, and adept at implementing agile methodologies and DevOps.

## Key Skills

- **Marketing Automation:** Experience with various automation tools and strategies
- **User Behaviour Tracking:** Detailed understanding of various user behaviour tracking methodologies for ad targeting and user impression gathering.
- **Programming:** Go (primary), Ruby, JavaScript, C#, C, Java, PHP
- **APIs:** RESTful, GraphQL, gRPC, WSDL + XML APIs
- **Data Management:** PostgreSQL, MySQL, BoltDB, Redshift, Green-Plum, Google BigQuery, Redis, Kafka
- **DevOps:** On-Call practice, experience with tracing (for e.g. with: Open-Telemetry), collecting metrics, automation
- **Applied Principles:** 12-factor methodology, SOLID principles, Hexagonal architecture, Clean Architecture
- **Methodologies:** Scrum, XP, Agile Development

## Open Source Projects

- **frameless:** Anti-framework for system flexibility and maintainability.
- **rack-app:** Minimalist ruby web framework.
- **testcase:** Toolkit for Go to support classicist TDD testing.
- **toggler:** Self-hosted feature flag and a release management service.

## **Professional Experience**

### **Senior Software Engineer | Teya / SaltPay | 2022 - 2023**

- Played a key role in enhancing payment systems and decreasing costs through smart routing of the payments
- Took part of the development of company's the acquiring registration system. (registering to acquiring hosts, preparing terminals for payments, etc)

### **Senior Software Engineer | Tutti / Tamedia / Swiss Marketplace Group | 2019 - 2022**

- Improved user experience and streamlined transactions in a second-hand marketplace.
- Extended the payment system by integrating a new payment option, leading to a substantial increase in revenue.

### **Senior Software Engineer | Cembra Money Bank | 2018 - 2019**

- Owned and led the replacement project of the ZEK integration system, leading to increased efficiency and continuous recognition from management.

### **Software Engineer | Emarsys-Technologies Kft | 2014 - 2018**

- Key contributor to the design and building of scalable solutions for storing and analyzing big data.
- Maintained Ruby and Golang client libraries, reducing integration time from a week to just minutes.

### **Software Engineer | VeryCreatives Consultant | 2014 - 2016**

- Designed a data aggregation ETL processing stack
- Held training on Agile practices, including topics such as the important of team communication through test automation.

### **Software Engineer | People Process Technologies | 2011 - 2014**

- Led the design and implementation of a workflow engine which increased integrations and facilitated acquisition of new government projects.
- Spearheaded the design and implementation of an internal payment handling system, which was adopted by the Hungarian Government for managing employee benefits.

### **Open-Source Contributor | 2011 - Present**

- Contributions to open-source projects along sharing my owns such as Frameless, Rack-App, Testcase, and Togglr.
- Regularly providing mentorship and sharing knowledge within the open-source community.

### **Software Development Intern | CFB Kft | 2009 - 2011**

- Participated in the design of compliant insurance software solutions, gaining understanding of the complex policy systems of the insurance sector.

## Education

- **Web Software Developer** (OKJ nmb 54 481 02): Developed skills in various programming languages, web development frameworks, and database management systems.
- **Client-Sided Software Developer** (OKJ nmb 54-481-02): Gained in-depth client-side programming knowledge.
- **Apprenticeship & Mentorship**: Participated in an apprenticeship program followed by a mentorship, further solidifying my software development skills.
